

# OmniTracs Navigation

## The fastest and most accurate mapping application in the transportation industry

OmniTracs Navigation is an always current and responsive in-cab navigation application that provides best-in-class truck routing, customized maps, and high-speed software updates. OmniTracs Navigation provides an optimized, driver-friendly user interface with visual and spoken turn-by-turn directions and real-time speed alerts.

### OmniTracs Navigation offers unsurpassed on-time delivery, operational efficiency — and a superior driver experience

Roads are constantly changing, and fleets need a navigation tool that provides accurate mapping information for drivers at all times. Most navigation applications in the market offer system updates once per year. At OmniTracs, we understand this might not be adequate for your fleet or your customers. OmniTracs Navigation offers quarterly over-the-air (OTA) updates transmitted via cellular network without the need of a physical connection, meaning the Navigation service is kept current with no disruption to fleet operation. Additionally, our drivers' community feature allows your drivers to provide feedback on anything they encounter, including new information on roads, point of interests (POIs), and speed limit changes, which are loaded daily into our database and shared with all our OmniTracs Navigation users.

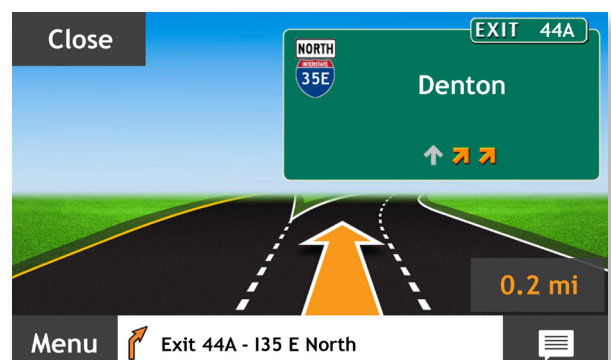

### Fast, accurate, and interactive...that's OmniTracs Navigation

#### Features

- Fast and reliable OTA software and data updates
- Database of over 250,000 drivers and over one billion data points
- Near real-time map and POI change requests
- Individual fleet customization
- Integrated with OmniTracs' suite of products
- Easily integrated with custom dispatch systems
- Drivers' community

#### Benefits

- Reduces costs
- Improves customer satisfaction
- Improves driver safety
- Increases driver efficiency
- Improves driver experience and job satisfaction

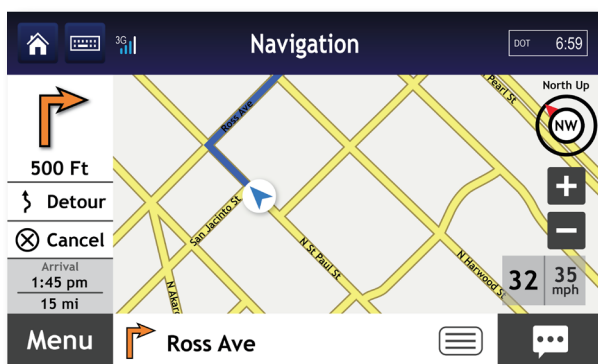

### Reduces Costs

Quarterly over-the-air system updates allow your fleet to stay on the road while your drivers receive the most accurate mapping information. More accurate data translates into less delays for your drivers and a higher rate of on-time deliveries.

### Improves Customer Satisfaction

Omnitracs Navigation database resides within the in-cabin unit and not at a remote server. That translates into faster response for your driver, especially during re-route calculations. Our service works with the Omnitracs product suite, major third-party Transportation Management Systems (TMS), and customized applications.

### Improves Driver Safety

Our application is optimized for your driver and fleet. Your designed route automatically avoids truck-restricted roads, with considerations for low clearances, truck size, and other restrictions. Omnitracs Navigation utilizes historical traffic conditions to provide the best available route. Real-time speed alerts are clearly displayed on your in-cabin unit.

### Improves Driver Experience

Omnitracs' database includes over 250,000 truck drivers and over one billion data points, giving you the most accurate and up-to-date mapping information in the industry. The application offers both visual and spoken turn-by-turn directions, and customized Points of Interest (POIs). POIs include truck stops, truck services, restaurants, fuel stations, and many more.

Learn how you can use our applications, platforms, and services to reduce costs, increase profitability, and stay competitive. Visit [www.omnitracs.com](http://www.omnitracs.com) and let us show you how you can save time and money.

### Getting More from Your Technology Investment

The Omnitracs Alliance Program facilitates integration of Omnitracs solutions with other leading companies that provide complementary technologies and services. This program taps into the power of integration in order to best meet the needs of our shared customers.

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

The Omnitracs Services Portal provides access to a suite of web-based fleet management applications, including satellite mapping. Data from the Services Portal can be integrated into your existing enterprise systems.

### About Omnitracs, LLC

Omnitracs, LLC is a global pioneer of fleet management, routing and predictive analytics solutions for private and for-hire fleets. Omnitracs' nearly 1,000 employees deliver software-as-a-service-based solutions to help more than 50,000 private and for-hire fleet customers manage nearly 1,500,000 mobile assets in more than 70 countries. The company pioneered the use of commercial vehicle telematics over 25 years ago and serves today as a powerhouse of innovative, intuitive technologies. Omnitracs transforms the transportation industry through technology and insight, featuring best-in-class solutions for compliance, safety and security, productivity, telematics and tracking, transportation management (TMS), planning and delivery, data and analytics, and professional services.
