

Vehicle Inspection Report Host Dashboard

Vehicle Inspection Report

We make it easy for you to complete your driver vehicle inspection reports quickly and accurately - and without paper!

Processing and storing paper driver vehicle inspection reports (DVIRs) costs your company time and money. Our Vehicle Inspection Report (VIR) application eliminates paper DVIRs and makes it easier for drivers to complete accurate vehicle and trailer inspection reports. Your fleet managers and drivers can access stored reports at any time and are alerted immediately to any DVIRs with unresolved defects. VIR saves time and money and can improve your company's compliance, safety, and defect resolution process.

Using Vehicle Inspection Report means less work for you.

How VIR Works

Vehicle Inspection Report provides a simple and affordable closed-loop process for completing vehicle and trailer inspection reports. Your drivers can access VIR as a standalone application or through Hours of Service. With regular prompts and alerts from VIR, your drivers stay compliant with all required inspection reports for both their tractors and trailers. They can easily complete inspections, make comments on defects, review and sign off on repairs, and submit the completed reports to the host system.

How VIR Works for you

By keeping a history of your inspection reports for 90 days, VIR allows you and your drivers to access the information you need to make sure you are resolving defects or missing VIR reports and staying on top of compliance requirements.

With VIR you can search quickly for information to review, edit, or print. With the VIR host dashboard overview, you can identify issues quickly, set up host alerts and emails, and control user access.

Where VIR Works

The Vehicle Inspection Report application is available on the MCP50, MCP110, and MCP200 platforms.

Say good-bye to paper driver vehicle inspection reports. Save time, money, and unnecessary errors.

Features

- Stores your vehicle and trailer inspection reports (VIRs) electronically on a Omnitrac's-hosted application that you can access 24/7/365 with any Internet connection.
- Keeps a history of your inspection reports for 90 days.
- Maintains your current VIRs on mobile units.
- Displays the number of VIRs with defects and shows total units without a recorded VIR in the past 24 hours on the host's executive dashboard.
- Sends email alerts when VIRs with defects are submitted for tractors and trailers.
- Notifies drivers when submitted VIRs are updated and closed by your maintenance department.
- Focuses on the critical inspection elements and requirements identified by the Federal Motor Carrier Safety Administration (FMCSA).
- Records feedback and remediation history on VIRs with identified defects.
- Provides separate inspection forms for trailer and vehicle.
- Includes relevant time, driver, and vehicle data on each VIR.
- Allows searching of VIRs by equipment type, driver, open/closed status, and date range.
- Allows printing or exporting of individual VIRs as well as reports.
- Lets you control who can view, update, and assign VIRs.
- Requires drivers to log in to access VIRs.
- Allows VIR access through Hours of Service interface or as a stand-alone application.

Benefits

- Saves your fleet money by eliminating paper VIRs.
- Saves your fleet time with easy access to centralized information and the ability to search, edit, and print information quickly.
- Reduces errors and increases accuracy through simple prompts and error-detection logic.
- Improves your defect resolution process, compliance, and driver safety with easy-to-use reporting and alerting capabilities.
- Allows your fleet to identify issues, such as missing VIRs, quickly with the host dashboard view.
- Allows you to control user access for maximum security.
- Improves accuracy of audit trails by providing relevant time, location, driver, and vehicle data on each VIR.

Vehicle Inspection Report wins Network Product Guide's 2012 award for best "IT Products and Services from Transportation."
